The objective of the project	P 5
Implementation of the project	P 6
The tools developed	P 7 to 14
The IDA application	p 15
Contacts	p 16

ONESTATEMENT, ONE PRIORITY

At a time when the digital transition is accelerating, imposing itself on everyone, many people find themselves far from it, not having the keys to access it. Among them, people with intellectual disabilities, a less visible disability, for whom few tools have been created.

Aware of this problem, several actors, from different European countries, working in the field of intellectual disability, met in 2019 at the initiative of the Papillons Blancs de Lille association, in order to take up this challenge by proposing the bases of a new project.

A few months later, the association presented the "Inclusive Digital Academy" project to the Erasmus+ France agency, as part of key action 2, strategic partnerships for innovation. The project has obtained a financing of 404 676,00 € from the European Union.

After having conducted a survey among people with disabilities on the uses of digital technology and a second one on what it could bring to their daily needs, the actors of the IDA project decided to focus on the basic tools, the ICT, to enter the digital world

The expected results should facilitate access to digital tools for communication and management of daily life. Special attention will be paid to security.

The research and development of digital solutions will be carried out through close collaboration between the beneficiaries and disability professionals and a team of IT researchers and developers.

The project will last 33 months, from December 2019 to August 2022

IDA workshops bringing together professionals and people with disabilities were held each week with the following mission

- A watch on existing tools
- The adaptation proposal
- The creation proposal
- Testing of the tools developed
- Presentation of results

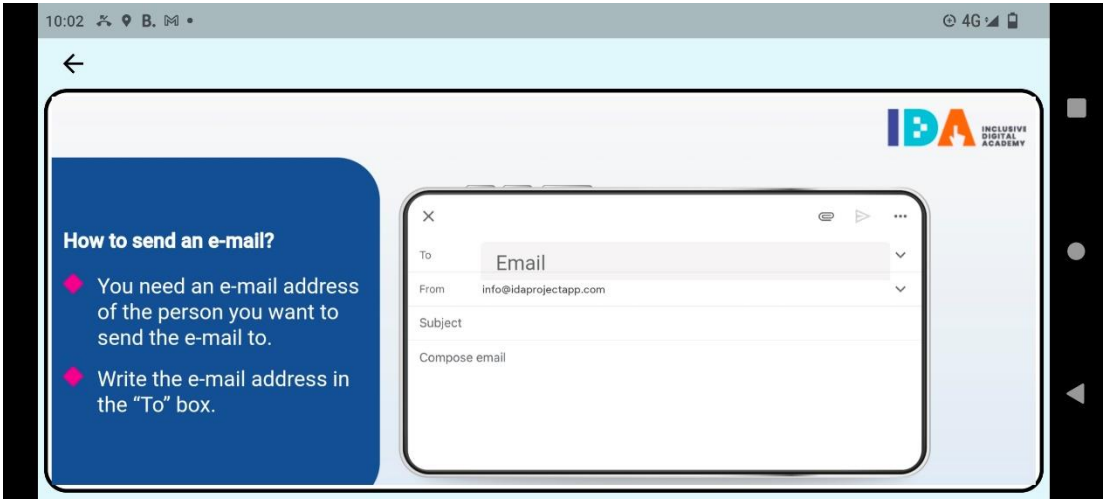

A multidisciplinary IT team was responsible for:

- Receipt of the order
- Feasibility assessment
- The development of tools
- The design of the application
- Functionality on the platforms

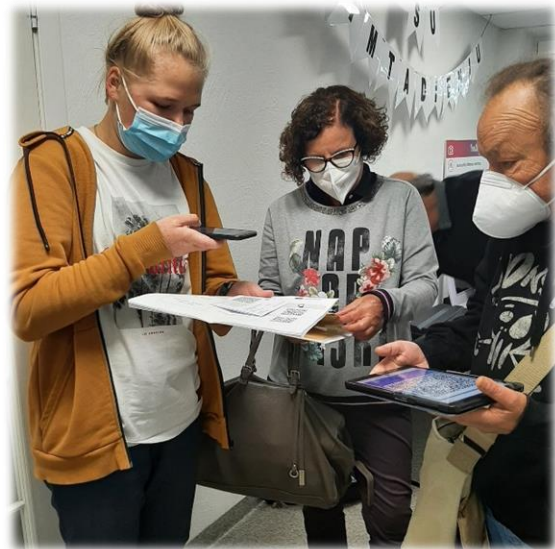

GMAIL MAILBOX

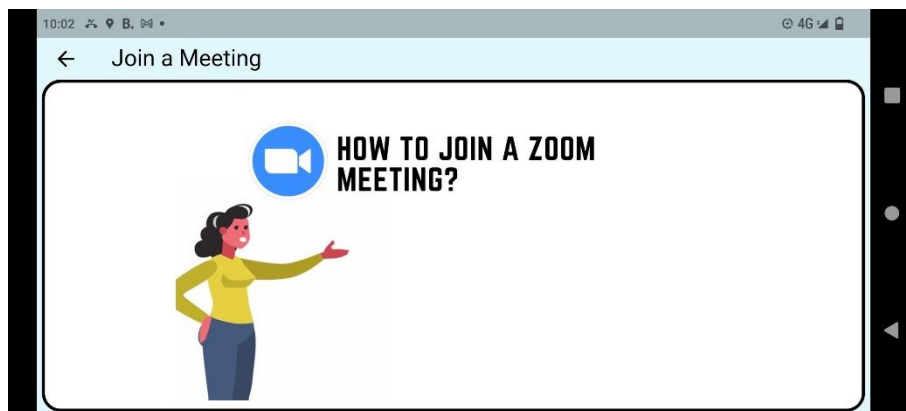

An animated step-by-step guide to sending an email

A downloadable guide to create an account

VIDEO-CONFERENCE WITH ZOOM

Animated films to learn to :

- Install the application on a computer
- Install the application on a smartphone
- Start a new meeting
- Join a meeting
- Schedule a meeting
- Share your screen

USE OF THE SMARTPHONE

Quiz to know the icons of his smartphone

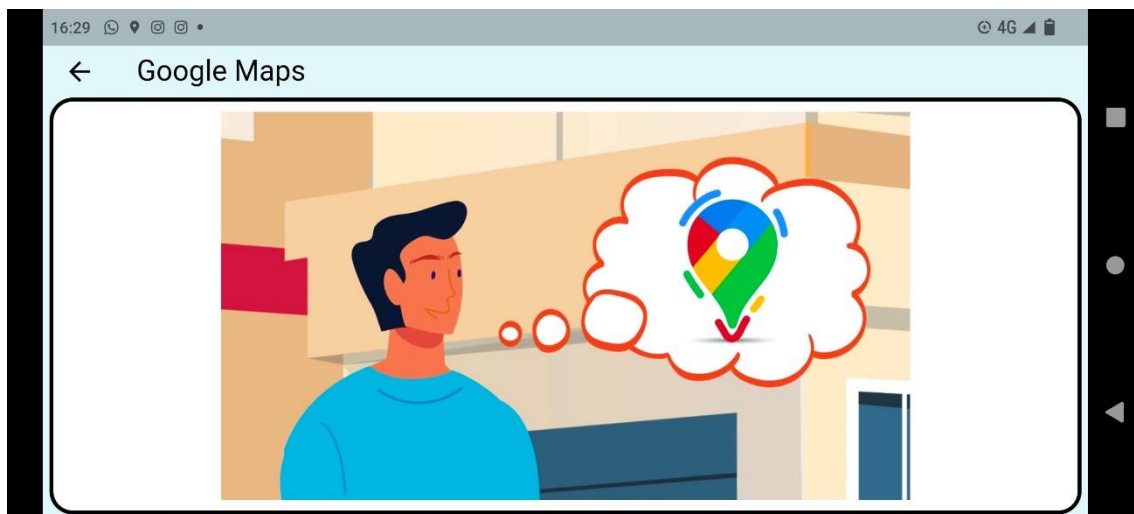

Complemented by animated films on:

- Take a picture, a selfie, a video
- Connecting with WIFI
- Using your mobile data
- Using the Bluetooth connection
- Make a call, manage your contacts
- Using your keyboard
- Program an alarm, a calendar

USE OF GOOGLE MAPS

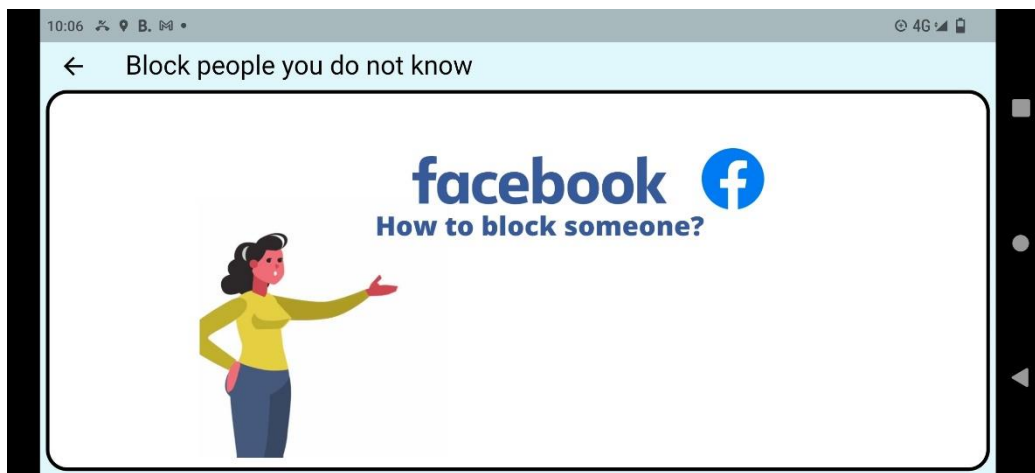

An animated film and a quiz for :

- Situate yourself
- Find a destination
- Calculate a route
- Choose a mode of travel
- Find places of interest
- Share your position
- Register a location

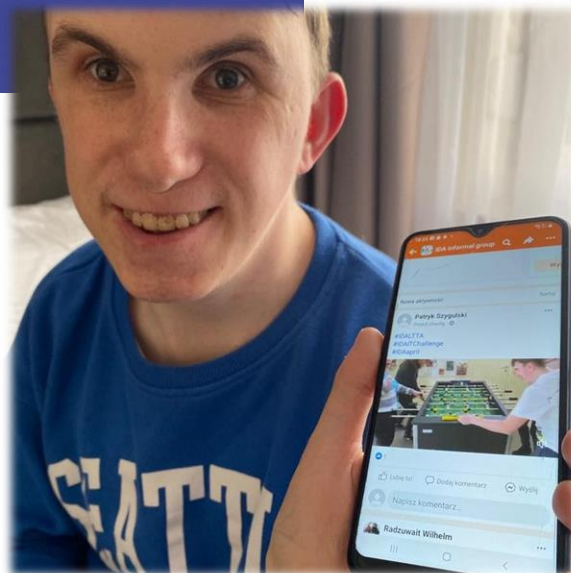

USE OF FACEBOOK

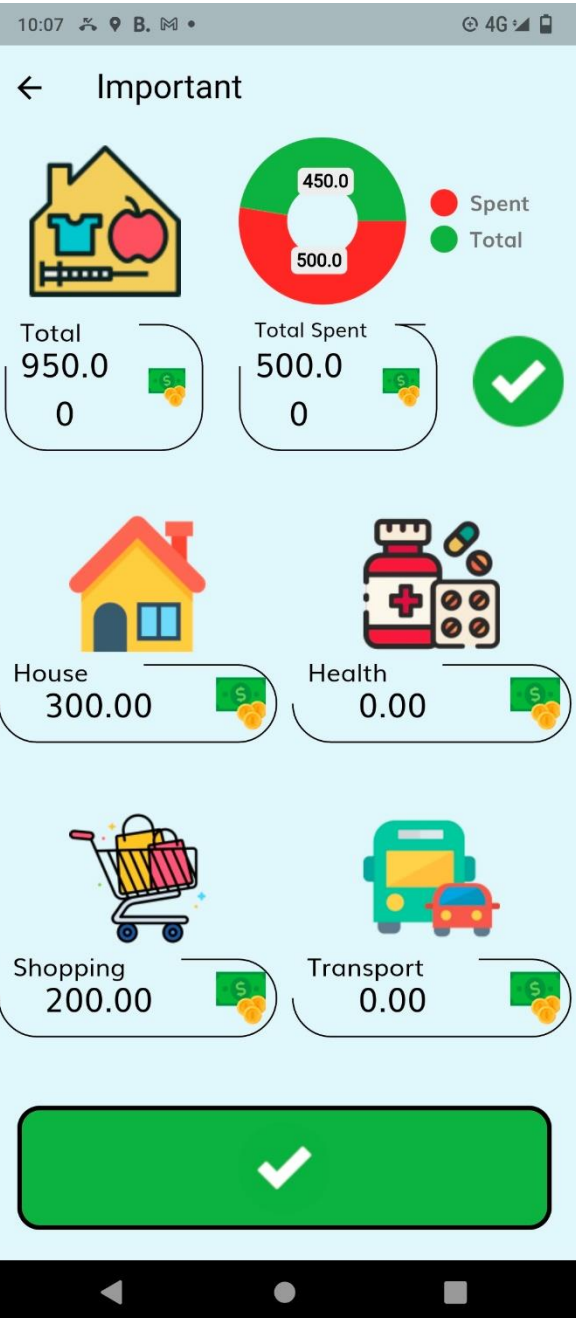

A series of animated films for:

- Register on the social network
- Connect to Facebook
- Like a publication
- Change your password
- Blocking people
- Set up your account for more security
- Be advised in case of abuse

BUDGET MANAGEMENT

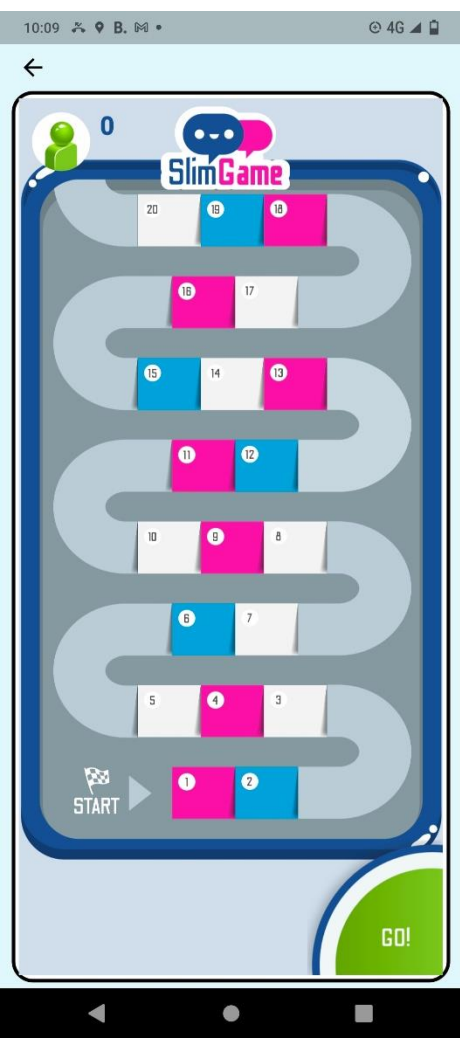

An application for:

- Managing a monthly budget
- Anticipate your expenses
- Prioritize your expenses
- Save money

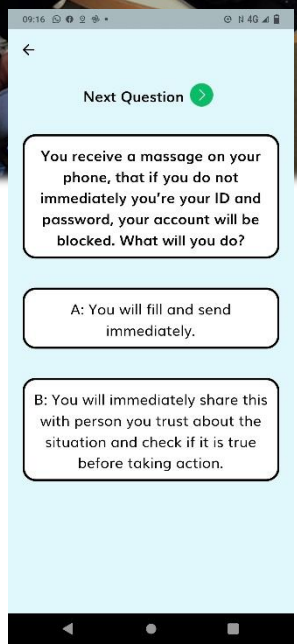

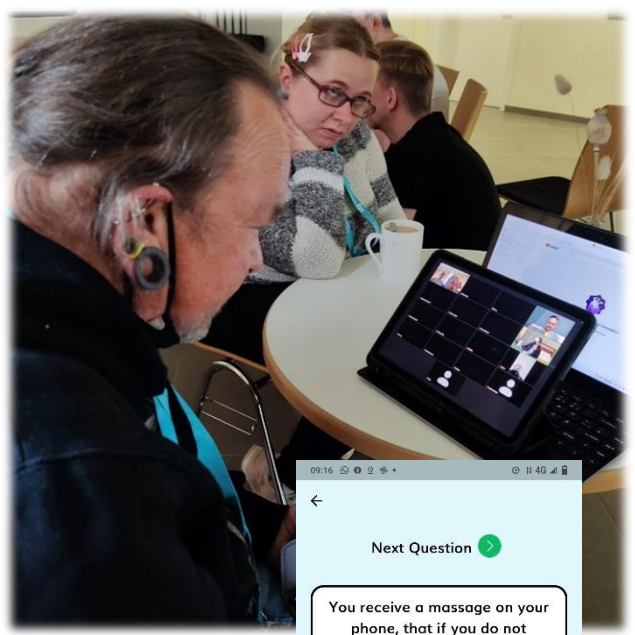

INTERNET SECURITY

A multiplayer game for/to :

- Evoke situations encountered
- Share opinions
- Find advice
- Identify fakenews
- Preventing abuse

A safety quiz

TASK MANAGEMENT

An application to :

- Plan your day
- Plan the month
- Customize tasks
- Create alarms
- Receive notifications
